

**UNIVERSAL - PORTABLE DISPLAY BOARDS**

user instructions

**1**  
Lay the base on the floor and insert the pole into the base. Screw in tight.

**2**  
Take a Universal corner fitting and drop down the channel section of the pole.

**3**  
Secure the moulding into position with a screwdriver. Repeat this process on the second pole.

**4**  
Lift one of the display board panels and position on top of both of the Universal corner fittings.

**5**  
Slide another two corner fittings down the pole, one facing down, one facing upward. Secure with screwdriver. Twist pole for easy access to retaining screws.

**6**  
Position the next display board on top, dropping into the corner fittings. Secure in position.

**7**  
Insert the top corner moulding. Secure into position.

**8**  
To add a header panel, insert the header pole and secure using the mouldings as above.

**9**  
Continue with this process for as many panels as you require for your exhibition / display.
