NOVA ACOUSTIC SCREENS

BRING A TOUCH OF LUXURY INTO YOUR OFFICE SPACE

Add a soft, luxurious screen without losing any of the sound absorbing properties that are vital in any office environment.

DESIGN

The Nova Screen is manufactured using a solid 18mm core with a double-layer of 12mm fire retardant foam both sides. Each screen is then upholstered in your chosen fabric colour.

FINISH

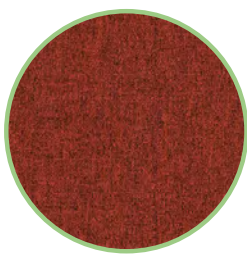

The Nova Screens have a simple design that makes a big impact. Finished with smooth rounded edges and a durable black edging the screens are built for both style and longevity.

UPGRADE

An upgraded option available allows us to offer 2 different fabric collections and a total of 51 different colourways. The fabric collections are either 100% recycled polyester (X2) or 100% Wool (Blazer Lite)

DELTA ACOUSTIC SCREENS

MADE IN THE **UK**

revitalising open office environments with modern design

BREATHE NEW LIFE INTO OUT-DATED OFFICE DESIGNS

DESIGN

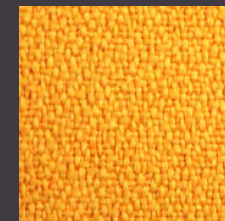

Each Delta Screen is manufactured using a solid 18mm core with a double-layer of 12mm fire retardant foam both sides. Each screen is then upholstered in your chosen fabric colour.

FINISH

Within the Delta Screen range there are various styles and shapes available from Wavetop to Cloud, each available in a wide selection of fabric colours. Each screen is finished with a blue piped edging and rounded corners for a softer look and stylish appearance.

UPGRADE

Supplied as standard with stabilising feet which can be swapped to castor feet to allow the screen to be portable. The option to upgrade to a wider range of fabrics is also available

Concept Office Screens

CONCEPT 2 & 3 PANELS

The Concept acoustic office screens offer a modern take on the standard office screen with the ability to choose more than 1 fabric colour.

FABRIC RANGES

WOVEN

UNIVERSE

MADE IN THE UK

DESIGN

The Concept 2 & 3 panels allow a choice of up to 3 fabric colours per screen. The screen has a solid 18mm core and a 12mm foam layered on both sides to help with noise.

Choose from the Woven & Universe fabric range.

FINISH

A black, white or silver powder coated aluminium frame encases the colourful acoustic panels.

Finally, select the fabric colours to fit with your existing colour scheme.

UPGRADE

Trip and wheelchair friendly stabilising feet are supplied with each of the Concept Screens.

However, if you wish for a portable screen, upgrade to the portable castor wheels.

Opt for a printed acrylic section with the 3 panel Concept Screen. Add a custom print of your choice for a personalised finish.

Acoustic OFFICE PODS

MADE IN THE UK

INNOVATIVE
SOLUTIONS TO
MAKE THE MOST OF
ANY OPEN PLAN
ENVIRONMENT

DESIGN

Our Acoustic Pods utilise a wide range of the acoustic screens we offer, with each screen using either a single or double layer of 12mm acoustically tested foam as well as a solid inner core. Various heights and widths of acoustic pods are offered, with each designed for purpose and the ability to be used in any environment.

FINISH

With each Acoustic Pod consisting of different screens from across our ranges the finishes vary from pod to pod. However, each pod is manufactured by us here in the UK using top quality materials to ensure that every order is of the same high standard.

UPGRADE

Each of our Acoustic Pods are manufactured to order, giving the ability to completely customise your order. From fabric and trim colours to acrylic finishes and foot options, the Pod can be designed to suit your requirements.

FANTASTIC ACOUSTIC
BENEFITS**

DESIGN

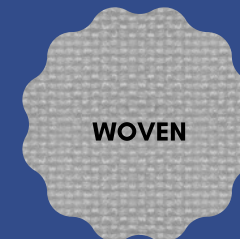

The Zenith acoustic wall panels utilise a frameless style to give a soft edge and finish. The range includes various different shapes and sizes, not only bringing something new to acoustic panelling but also providing you with custom options.

FINISH

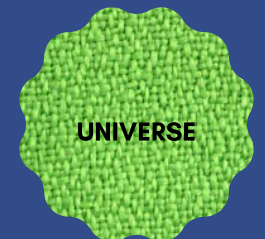

Each panel consists of a solid core topped with 12mm acoustically tested foam which is then upholstered in your chosen fabric range and colour. Panels can be easily attached to the walls without the use of complicated fittings.

UPGRADE

Available in 2 fabric ranges, the Zenith panels can be purchased in a wide range of colours so you can choose a colour to match your branding or mix and match to create a unique design.

ELITE DESKTOP DIVIDER

an eye-catching
monochromatic style
that helps increase
productivity and
concentration

MADE IN THE **UK**

DESIGN

Each Elite desktop screen is manufactured using black powder coated aluminium edging to give a sophisticated and sleek look. The half acrylic half laminate finish adds both style and functionality, making the screens easy to clean.

FINISH

The white gloss laminate base adds not only a clean look but also provides a drywipe surface that is completely wipeable. The half and half layout with clear acrylic section provides privacy while still allowing light to flow through.

UPGRADE

As standard the screens are supplied with our drill-through clamps. The option to upgrade to our easy-fix desktop clamps (image below) which fit simply to the edge of the desk and are inserted into the edging of the screen.

Easily join screens together using linking strips

The clean finish and bold statement will take your office design to the next level

SLIMLINE

STYLISH

AFFORDABLE

OMEGA DESKTOP DIVIDERS

DESIGN

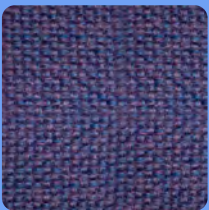

Omega Screens are manufactured using a solid 18mm core with either a layer of 12mm fire retardant foam both sides or an 8mm pinnable board. Each screen is then upholstered in your chosen fabric colour.

FINISH

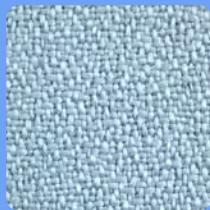

With two style options; straight or wavetop, we've kept the design of the Omega Screens simple but effective. With a non-linking black or grey edging all round and desk fittings that fit into the screen to keep everything neat. Radius corners also offer a smooth and stylish finish.

UPGRADE

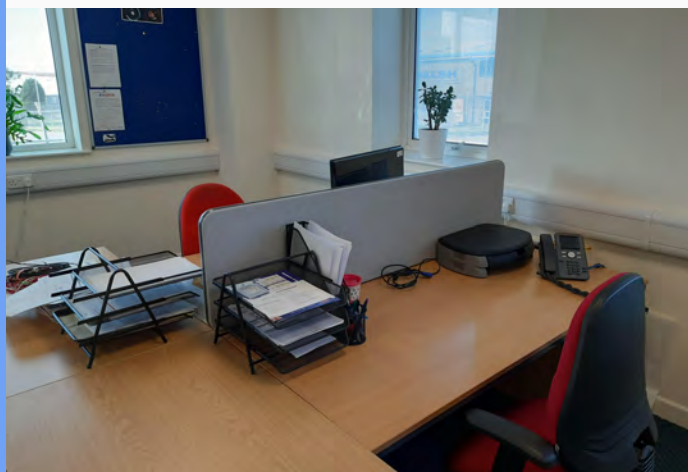

Upgrades are available for the Omega Screens in the form of the Universe fabric, which opens up a wider range of colours. Each screen is supplied with a set of drill-through clamps which can be upgraded to an easy-fix clamp instead.

Shield Screens

easy to use and clean,
versatile dividing
solution that can be
used on any surface,
desktop or workspace

DESIGN

Shield desktop screens have been designed to be used without the need of clamps or desktop attachments. The clear acrylic round base allows the screens to be positioned on any flat desktop surface at any time, meaning that the screens can be moved to various locations as required.

FINISH

The clear acrylic finish used not only makes the screens 100% transparent but also completely wipeable and easy to clean. The grey PVC framework gives the screens a robust finish, whilst also providing the ability to link screens together as well as a dual acrylic base to minimise the number required.

UPGRADE

Within the range 2 heights are available, 600mm and 800mm, to provide maximum coverage and stability. Frosted acrylic is also available if this finish is preferred. Double connectors are provided when planning to use the screens connected for a secure fitting.

Without the use of clamps, you'll be able to position the screen on to any table, at any point.

ACRYLIC DESKTOP DIVIDER

SEPARATES WORKSTATIONS
WITH 5MM CLEAR ACRYLIC

Easy clean surface

DESIGN

The Acrylic Desktop Screen provides a transparent desktop divider, made with 3mm acrylic.

The curved edges offer a soft finish and safely divide desktop and workspaces.

FINISH

The clear acrylic ensures full visibility across the office, letting natural light shine through.

The supplied desk clamps easily fit to any worktop sizes 17mm - 44mm.

SNEEZE SCREENS

ACRYLIC DESKTOP DIVIDER

Slimline, clear acrylic desktop screens to divide & separate open work spaces into individual desk space.

Made in the UK

**Light weight, modern &
securely fixes to desk**

DESIGN

The Desktop Sneeze Screens have been designed with 3mm clear acrylic, and framed with a grey robust PVC edging.

When secure to the desk, you can connect various screens for a configuration suited to the desk space.

FINISH

Clear acrylic desktop screens with a grey edging. The supplied poles match the frame with a silver aluminium.

The poles have 4 hanging points to allow for bespoke configuration

FIXINGS

To secure the dividers, each screen is supplied with drill through fixings.
